

CSC493 – Weekly Reports

Your name: <Jarine Fietsop>

Week: <7>

Part 1: Weekly Progress Report

- **Accomplishments:** What did you accomplish since the last class meeting?

This week, I worked on the listings in my ecommerce website. I worked on adding the different clothing that I would like to sell. I still have a lot of listings to add to my store. Again, I was able to add more information on my home page which I still have to design using CSS code.

- **Challenges:** What are your current roadblocks?

I find it challenging to add multiple listings of one product. I am able to add different listings but when I tried adding multiple pictures of the same product, I had a challenge with this. In a website, it is good when the user is able to see different pictures of the product that they are interested in purchasing.

- **Desired Discussion Points:** Do you have any desired discussion points that are not related to roadblocks?

What framework should I use for better design? Can I use Bootstrap or React ?

- **Future Goal:** What do you plan to accomplish before our next class meeting? These plans should be related to roadblocks or discussion points. If you plan to change direction, explain why.

I plan to complete the front end design of this website this upcoming week and then work to add the functionality to the buttons. Again, I will like to use CSS to add some more design to the text that I added to my homepage.

Part 2: Time Reporting

Make sure that as you fill out the first prompt, you include in enough detail in the summary. For example, "debugging" is vague, but "debugged function X to make sure that when user does action Y, it is called and returns the value Z" is better.

- **Time Spent:** Briefly explain how much time you spent on your project. If you worked on multiple components, each should get a detailed summary.

I spent 6 hours coding
3 hours doing some research and about 2 hours watching some CSS tutorials.

- **Weekly Total Time Spent:** Make sure to add up all the hours and minutes correctly.

About 11 hours in total

- **Total Project Time Spent:** After the number of hours and minutes, make sure to briefly explain whether you are on track and if not, what you may need to do in order to achieve what you set out to accomplish.

So far, I think I am on track with what I have planned to do. But I have to get started with the code if not I might run out of time.

Rubric:

The following rubric will be used, but they might change as needed.

Accomplishments (3 points)

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how currently accomplishments build on previous ones.

Challenges (3 points)

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

Desired discussion points (2 points)

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

Future Goals (2 points)

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.

Time Spent (3 points)

1 point for including general statements of how much time was spent ("4 hours on coding"), 2 points for splitting time into specific parts ("1.5 hours on research on component X, 1 hour coding, 2.5 hours debugging"), 3 points for specific parts and details on the pieces ("1.5 hours researching Turtle interface for drawing concentric circles given inputs from the user, 1 hour coding function X that used that interface, 2.5 hours testing function X by giving it multiple values and fixing errors for values A, B, C, and D")

Weekly Total Time (1 point)

Total Project Time (2 points)

1 point for summing the values correctly, 2 points for the total time AND reflection on progress (you are confident to fit the target and if not, what course corrections you anticipate needing to make)
