CSC493 – Weekly Reports

Your name: <mark><Jarine Fietsop></mark>

Week: <mark><6></mark>

Part 1: Weekly Progress Report

- **Accomplishments**: What did you accomplish since the last class meeting?

> Since the last class, I have continued to work on my front end. I have added the search bar and the search button on my homepage. I have added the footer with links to my social media platforms and the copyright for my website. I have also add a shop page and I have started adding the listing to the things that I will sell.

- **Challenges**: What are your current roadblocks?

> My current roadblocks is having a couple of pictures on the screen when my users visit the shop page. Also, I want the user to be able to click on one product and have all the listings for that product displayed.

- **Desired Discussion Points**: Do you have any desired discussion points that are not related to roadblocks?

> How can I use Bootstrap framework to display and design the listing on my website? Will React be better or should I stick with Boostrap?

- **Future Goal**: What do you plan to accomplish before our next class meeting? These plans should be related to roadblocks or discussion points. It you plan to change direction, explain why.

> I plan to continue working on my frontend development and add the two remaining pages. I also plan to add JavaScript Code that will give functionality to my website.

Part 2: Time Reporting

Make sure that as you fill out the first prompt, you include in enough detail in the summary. For example, "debugging" is vague, but "debugged function X to make sure that when user does action Y, it is called and returns the value Z" is better.

- **Time Spent**: Briefly explain how much time you spent on your project. If you worked on multiple components, each should get a detailed summary.

> 11 hours
> 8 hours spent of coding.
> 2 hours was spent learning and searching tutorials that could help me move forward on my project.
> 1 hour was spent asking for some help from my friends who have a lot more experience with JavaScript.

- **Weekly Total Time Spent**: Make sure to add up all the hours and minutes correctly.

11 hours in total

- **Total Project Time Spent**: After the number of hours and minutes, make sure to briefly explain whether you are on track and if not, what you may need to do in order to achieve what you set out to accomplish.

Yes, I am on track with what I plan to do because I am holding firm to the blueprint that I have for my project.

Rubric:

The following rubric will be used, but they might change as needed.

Accomplishments (3 points)

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how currently accomplishments build on previous ones.

Challenges (3 points)

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

Desired discussion points (2 points)

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

Future Goals (2 points)

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.

Time Spent (3 points)

1 point for including general statements of how much time was spent ("4 hours on coding"), 2 points for splitting time into specific parts ("1.5 hours on research on component X, 1 hour coding, 2.5 hours debugging"), 3 points for specific parts and details on the pieces ("1.5 hours researching Turtle interface for drawing concentric circles given inputs from the user, 1 hour coding function X that used that interface, 2.5 hours testing function X by giving it multiple values and fixing errors for values A, B, C, and D")

Weekly Total Time (1 point)

Total Project Time (2 points)

1 point for summing the values correctly, 2 points for the total time AND reflection on progress (you are confident to fit the target and if not, what course corrections you anticipate needing to make)
